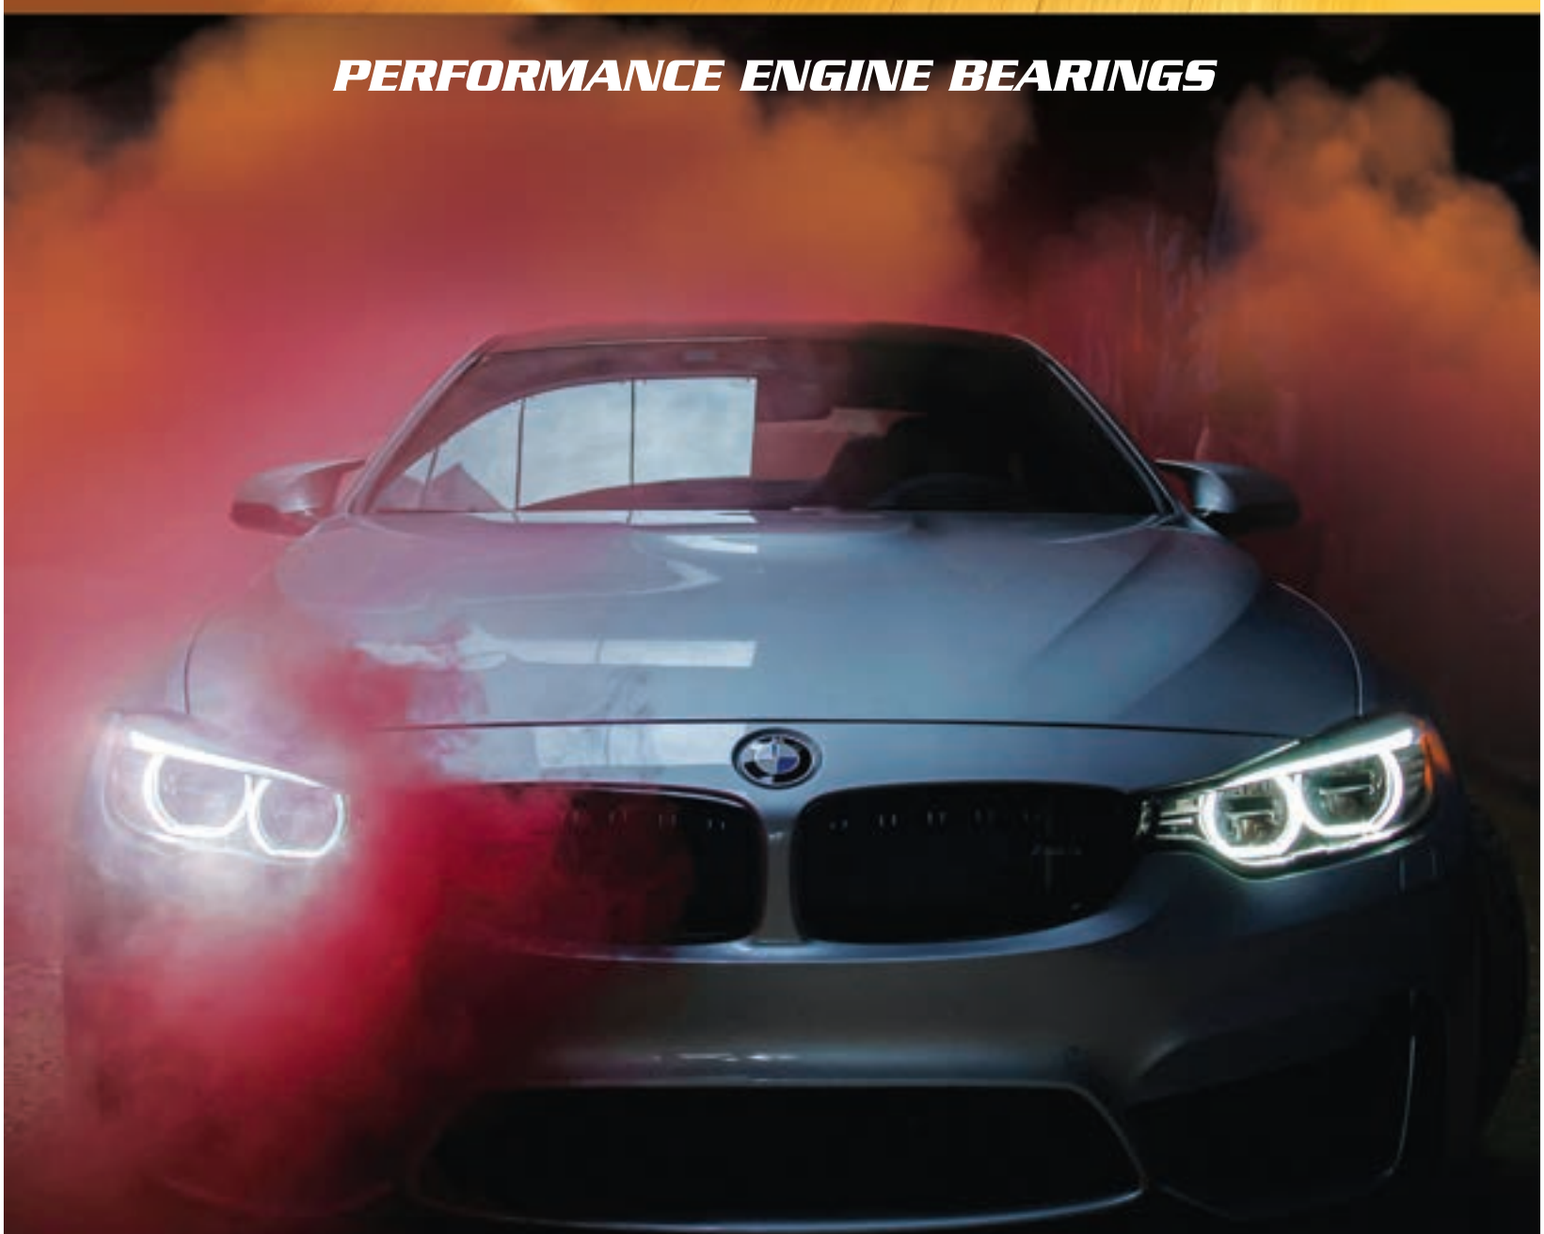
ACL RACE SERIES

PERFORMANCE ENGINE BEARINGS



BMW

APPLICATION GUIDE

OUR WORLD IN MOTORSPORT

IF YOU PLACE DEMANDS ON YOUR ENGINE...

DEMAND THE BEST.

ACL has a proud and rich history in motorsport – it's in our DNA. The racetrack, in all its forms, remains the ultimate proving ground. In the heat of competition, proven technology rises to the challenge.

Today's ACL RACE Series performance engine bearing range carries a strong motorsport pedigree, tracing its roots back to the 1960's with the manufacture of engine bearings for the world-conquering Brabham Formula 1 team.

Decades of experience in the Australian Supercars Championship and numerous other racing categories have shaped the development of the current ACL RACE Series technology platform. It's a unique blend of design, metallurgy, engineering, and precision quality control – delivering the performance and reliability engine builders demand.

Whatever your application, we've got you covered. If you're looking for the best – demand the best.

NO RISK NO COMPROMISE TOTAL PERFORMANCE

YOUR #1 BMW SOLUTION

BMW engines have earned a legendary reputation for smooth power delivery, engineering precision, and racing pedigree. From the high-revving S65 and twin-turbocharged S63 V8s to the classic M20 inline-sixes, BMW's engine lineage is built on innovation and performance. Modern powerplants like the turbocharged N54, N55, and B58 continue this legacy, while engines like the S54 and S55 are revered for their naturally aspirated and high-revving characteristics.

Renowned for their balance, responsiveness, and tuning potential, these engines have become favourites in factory performance cars and engine swap projects alike. Whether in drift, circuit, or street builds, BMW powertrains are celebrated globally for their capabilities.

ACL offers a dedicated range of RACE Series performance engine bearings to suit BMW's most iconic engine platforms including the S63, N54, S54, B58, M50, and more. Whether you're building a street sleeper or engineering a race-winning setup, ACL RACE Series delivers the high-performance bearing solutions you need to push your BMW to the limit.

BEARING SET NUMBERS

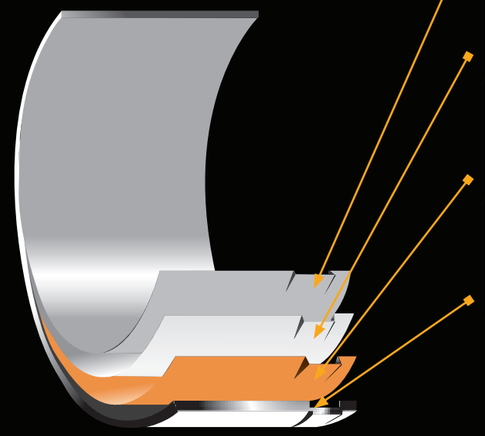
ACL Race Series performance engine bearings are identified from the standard range by the following suffixes.

Set Number	Part Description
H	ACL Race Series
HX	ACL Race Series with 0.025mm (.001") extra clearance.
HC	ACL Race Series, Calico Coated*.
HXC	ACL Race Series with 0.025mm (.001") extra clearance, Calico Coated*.
*Assorted Calico coated sets available upon request.	

BEARING MATERIAL ENHANCEMENTS

A blend of characteristics to provide high strength and excellent seizure resistance.

No flash plating is applied to further improve bearing retention and maximise heat transfer.



LAYER	ALLOY
OVERLAY	Lead - Tin - Copper
Thickness (Typical) 0.013* - 0.018mm / 0.0005" - 0.0007"	
*Connecting Rod Bearings Only - Reduced for increased fatigue resistance	
Seizure Resistant - Low friction and deformable	

BARRIER	NICKEL
Thickness (Typical) 0.001mm / 0.00004"	
Separation Layer	

LINING	COPPER - LEAD - TIN
Thickness (Typical) 0.3mm / 0.012"	
Fatigue Strength - Strong yet deformable	

STEEL	**SAE1010** (High tensile)
Thickness (Typical) Remainder	
High Strength - Supports bearing lining	

SELECT FITTING OF ACL RACE SERIES PERFORMANCE ENGINE BEARINGS

It is common practice to adjust oil clearances by mixing bearings of adjacent grades i.e. HX-STD with H-STD or H-STD with H-001 or H-0.025, to obtain desired oil clearance. Using the HX-STD with H-STD will give .0005" (0.013mm) additional clearance than using two H-STD shells, and similarly using H-STD and H-001 will reduce clearance .0005" (0.013mm). The table below demostrates this in more detail.

Bearing shells with a wall size difference of .0005" (0.013 mm) or less can be assembled on one journal. The thicker wall size bearing is fitted to the most heavily loaded position, i.e., the upper half of the conrod shell and the lower half or cap position of the main bearing.

Selecting Bearings for the Optimised Fit (For "STD" Sized Crankshaft)

Bearing Size	Effects on Clearance				
	Per Bearing	Bearing Combinations			
		Matched Pairs		Mixed Pairs	
H-001 / H-.025	-.0005" / -0.0125mm	H-.025 / H-001	-0.0250mm / -.001"		
		H-.025 / H-001		H-.025 / H-001	-0.0125mm / -.0005"
H-STD	0.0	H-STD	0.0	H-STD	
		H-STD		H-STD	+0.0125mm / +.0005"
HX-STD	+.0005" / +0.0125mm	HX-STD	+0.0250mm / +.001"	HX-STD	
		HX-STD
